

Road Sign Retaining Bags

Why do this?

When you can do this?

Road Sign Retaining Bags are tools for effectively holding road signs in place against the elements and turbulence created by large passing vehicles (more than one bag can be placed on the sign depending on the conditions). They do this safely and unobtrusively and will not create a hazard for passing motorists.

- It's rugged
- It's simple to use
- It stays in situ on the sign.
- Its central hole fits over the sign base.
- Minimal space required for storage
- Length 600mm, Width 300mm and Height 90mm
- Only 20kg per bag
- 2-3 year life span against UV rays for the bag material
