

# Road Sign Retaining Bags

Engineered Stability for Roadside Signage

Road Sign Retaining Bags are durable and efficient tools designed to securely anchor road signs in place, especially in environments exposed to high winds or turbulence from large passing vehicles. These retaining bags provide a safe, unobtrusive solution that minimizes risk to passing motorists while ensuring signage remains stable and visible.

## Key Features

- Rugged Design:** Built to withstand harsh weather and roadside conditions.
- User-Friendly:** Simple to install and remove, with no special tools required.
- Secure Fit:** Engineered to stay firmly in place on the sign, even in turbulent environments.
- Integrated Central Hole:** Designed to fit over the sign base for secure positioning.
- Compact Storage:** Low-profile design takes up minimal storage space when not in use.
- Durable Material:** Fully UV-resistant construction.

## Application

Use one or more bags depending on wind and traffic conditions. Ideal for use on highways, construction zones, or any roadside environment where sign stability is critical.

## Specifications

- Size: L600mm x W300mm x H90mm
- Weight: 20 kg per bag
- Extremely long life span
